loop statements : They are used to control the execution of the loops.

1. break
2. Continue
3. pass

1. Break statement : The break statement is used to stop the loop immediately.

Once the condition is satisfied, the loop will terminate.

Syntax :

```
for i in range(1,6):
    if i==3:
        break
    print(i);
```

2. Continue : is used to skip the current iteration & move to the next iteration.

Syntax :

```
for i in range(1,6):
    if i==3:
        continue
    print(i)
```

3. pass : it does nothing. It is used as a placeholder when you don't want to write any code yet.

Syntax :

```
for i in range(1,6):
    if i==3:
        pass
    print(i)
```

o/p

```
1
2
3
4
5
```
